

Tosheka Products Biomass Briquettes / Boiler Fuel

Croton Shells as a source of biomass for boilers /briquettes:

Our Croton shells and briquettes were tested by KIRDI with great results and a major customer has tested and purchased (800 tons) of our Croton Shells as biomass for their boilers.

Our Biomass briquettes - calorific value of about 3,4065 cal / Kg;
are Low in ash content 1.47: have high bulk density: Low moisture content 7.18 and a sulphur/carbon Neutral Fuel.

Advantages:

Cost-effective; renewable source; no sulphur, it has a higher calorific value than other solid fuel sources; has much higher boiling efficiency; less greenhouse gas and harmful emissions. Save our forest and future!

Our Croton shells sacks contain aprox. 50 kgs.

Cost per KG Ksh .10. or Ksh 500. per sack

Our briquettes sacks contain (185) briquettes aprox. 32 kgs.

Retail price = 1,600. The wholesale price = 1,300.
