

The Business Opportunity:

To unlock the potential of a business in the African landscape with cutting edge internationally scalable series of nutritional products and, alternative protein that will enhance local food security.

The ability to quickly scale up production to meet demand because of our current traction.

To support a business with a range of complimentary products and revenue streams and access to a ready market in Kenya, neighboring countries, and the global market.

Provide local organic fertilizer to an agricultural country that relies heavily on imported, and chemical fertilizers that have resulted in declining productivity.

We will utilize Fintech to manage our production and the newest equipment technology that are cost and quality competitive.

Investment considerations:

Our financial projection shows a good secure return on investment of 7 / 1.

- A profitable and impactful business
- Your capital equity injection will provide you with the above benefits and leading brand recognition.

- These funds will unlock the business potential and establish our path to massive growth and product development partners, distributors, buyers, and investor funding.
- The Alternative Protein and Nutraceutical sectors of Agra Business are some of the top new areas of funding, startups and business interest.
- Our system produces the cheapest low-tech clean alternative protein.
- We have a very favorable risk-to-reward profile compared to any of the Alternative protein business models.
- Rare opportunity in the African Business landscape to partner with a social enterprise that has a high-performance potential.
- Cutting-edge internationally scalable products in the nutrition and alternative protein food ecosystem.
- Massive local, and regional market of two million refugees for our nutritional supplements.
